# The 18<sup>th</sup> Annual Practical Pediatrics Conference

## April 11, 2018

## THEME:

### WHAT'S NEW?

We would like to showcase some recent initiatives at McMaster Children's Hospital. We will provide an evidence based review of some of the recent recommendations in both general pediatrics and the NICU/SCN setting. We are introducing two Quick Hits that consist of interesting clinical case presentations. We are trying a new audience participation platform.

### PROGRAM OBJECTIVES

Gain up-to-date evidence based knowledge on key topics related to general pediatrics and neonatal care.

Present indicators for the prescription of medical marijuana, particularly as it applies to children with medical complexity.

Learn about transgender nomenclature, medical and non-medicinal management options.

Review an approach to tackling two challenging/mysterious cases.

Recognize and enhance the ability to identify a selection of pediatric spot diagnoses.
